INNOVATING MICROBIOLOGY

VITEK[®] 2

EFFICIENT WORKFLOW.
FASTEST ROUTINE AST RESULTS.
FULLY INTEGRATED ID & AST.

PIONEERING DIAGNOSTICS

INNOVATING MICROBIOLOGY FOR BETTER PATIENT CARE

SMART Multidrug-Resistant Organisms management New Antimicrobial Susceptibility Testing

NEW

VITEK® 2 AST-N439 card

Product code 424501

Amikacin

Amoxicillin/Clavulanic Acid

Cefepime

Ceftazidime

Ceftazidime/Avibactam

Ceftolozane/Tazobactam

Ciprofloxacin

Colistin

Fosfomycin

Gentamicin

Imipenem/Relebactam

Meropenem

Meropenem/Vaborbactam

Piperacillin/Tazobactam

Tigecycline

VITEK®2 AST-N439 CARDS OFFER:

- 15 antimicrobials
- Minimal Inhibitory Concentration(MIC) testing
- Gram-negative bacillus organisms
- Optimize antibiotic therapy with new antimicrobials
- Support continuous improvement of initial antimicrobial therapy with the use of MAESTRIA® based antibiogram reports

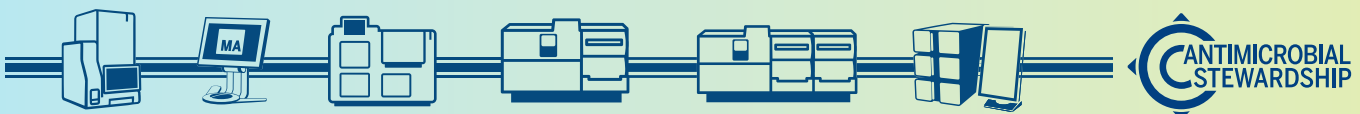

INNOVATING MICROBIOLOGY is at the heart of VITEK® SOLUTIONS.

With our constant advances in workflow efficiency and integration, we provide you with the fastest ID & AST* solution. Designed by microbiologists for microbiologists, count on VITEK® SOLUTIONS to accompany all your ID & AST needs from routine to critical patient challenges.

Drive your AMS† programs with diagnostics. Take more informed therapy decisions sooner.

*IDENTIFICATION & ANTIMICROBIAL SUSCEPTIBILITY TESTING †ANTIMICROBIAL STEWARDSHIP
